

AN INTRODUCTION TO PROPERTIES AND EVALUATION OF ENGINEERING MATERIALS

Contents

Chapter One: Properties	1
Chapter Two: Cement	33
2.1 Introduction	33
2.2 Portland Cement	35
2.3 Summary of Manufacturing Process	36
2.4 Cement Manufacturing Process in Detail	37
2.5 Basic Chemistry of Cement	44
2.6 Setting and Hardening of cement	47
2.7 Portland Cements and their Specifications	48
2.8 Standard Tests for Portland Cements	52
Chapter Three: Steel	65
3.1 Introduction	65
3.2 Steel Glossary	66
3.3 Rebar sizes and grades	74
3.4 Types of Steel	77
3.5 Making Steels	79
3.6 Prestressing steel	89
3.7 Standard Shapes and Sizes	91
Chapter Four: Concrete	95
4.1 Introduction	95
4.2 Glossary of Concrete Terms	99
4.3 Modulus of Elasticity of Concrete	101
4.4 Properties of Fresh Concrete	103
4.5 Slump Test	104
4.6 Discussion on Workability, Segregation, Bleeding, and Plastic Shrinkage	106
4.7 Curing	108
4.8 Admixtures for Concrete	112
4.9 Concrete Shrinkage, Cracking and Major Types	113
Chapter Five: Aggregates	119
5.1 Introduction	119
5.2 Classification of Aggregates	119

5.3 Aggregate Characteristics and Concrete Behavior	121
5.4 Influence of Aggregate on Concrete Strength	128
5.5 Specification of Coarse Aggregate as per Road Structure Manual of LGED	128
Chapter Six: Timber	135
6.1 Introduction	135
6.2 Classification	136
6.3 Main Structural Features of Tree Stem	137
6.4 Common Defects	142
6.5 Timber trees based on growth location	146
6.6 Lumber Seasoning	146
6.7 Wood Equivalent Products	148
Chapter Seven: Brick	153
7.1 Introduction	135
7.2 Classification of Bricks according to BDS 208	158
7.3 Brick Industry Situation in Bangladesh	160
7.4 Process of making brick	161
7.5 Brick Nomenclature	175
7.6 Brickwork	176
Chapter Eight: Paint	181
8.1 Introduction	181
8.2 Paints constituents and their functions	181
8.3 Types of Paints	183
8.4 Methods of Painting	185
8.5 Pigment Volume Concentration (PVC)	186
Chapter Nine: Concrete Mix Design	189
9.1 Introduction	189
9.2 Background Data	191
9.3 Flowchart for ACI Mix Design	192
9.4 Mix Design Procedures	193
Chapter Ten: Sand	201
10.1 Introduction	201
10.2 Field Testing of Sand	202
10.3 Specification of Fine Aggregate as per Road Structure Manual of LGED	204
10.4 Standard Specification (ASTM C	

778) for	
Standard Sand	205
10.5 Sand Characteristics in Bangladesh	205
10.6 Fineness Modulus (FM)	207
10.7 Sieve Analysis and Gradation	212
Chapter Eleven: Soil	221
11.1 Introduction	221
11.2 Soil Classification	222
11.3 Analytical Representation of Soil	224
11.4 Consistency Limits or Atterberg Limits	226
Chapter Twelve: Miscellaneous	243
