

BEGINNER'S ENTRY TO ANALYSIS OF STATICALLY DETERMINATE STRUCTURES

Contents

Chapter 1 Introduction		
1.1	What Does the Word Structure Mean?	1
1.2	What is Structural Analysis?	2
1.3	The Common Structural Forms	2
1.4	Composite Structures	6
1.5	Truss, Frame, Plate, and Shell	7
1.6	Appropriate Number of Significant Figures	8
1.7	Engineering and Science	9
1.8	Presenting Results of a Calculation	9
1.9	Doers and Checkers	10
Chapter 2 Review of Statics and Others		
2.1	Supports and Reaction Forces	11
2.2	Equations of Equilibrium	11
2.3	Triangular Relationship- Force vs. Length	11
Chapter 3 Shear Force, Bending Moment		
3.1	Shear and Bending Moment	29
3.2	Important Notes on SFD and BMD	29
3.3	Change of the SFD and BMD Shapes	36
3.4	Selection of Curve	39
3.5	Shear and Moment Diagrams for a Frame	48
3.6	Moment Diagram Constructed by the Method of Superposition	49
Chapter 4 Review of Truss, Beam		
4.1	Truss	91
4.2	History	92
4.3	Early Evolution of Trusses	92
4.4	Trusses of Economical Proportions	98
4.5	Classification of coplanar truss	102

4.6	Analysis of Trusses	104
4.7	Beam Moment, Curvature, Slope and Deflection	106
Chapter 5 Determinacy and Stability		
5.1	Idealized Structure	111
5.2	Types of Idealization or Modeling	112
5.3	Determinacy and Stability for Beams and Frames	114
5.4	Determinacy and Stability for Trusses	127
Chapter 6 Influence Lines		
6.1	Introduction to Influence Lines	131
6.2	Generation of Influence Lines Using the Müller-Breslau Principle	133
6.3	Generation of Influence Lines Using Statics	142
6.4	Placement of Loads on Influence Lines	150
6.5	Calculation of Reactions, Internal Shears and Internal Moments Using Influence Lines	155
6.6	Truss Influence Lines	178
6.7	Placing Moving Loads for Maximum Moment	186
6.8	General Rules for Simple Beams Carrying Moving Loads	188
6.9	Envelop for Moving Loads	188
6.10	Reactions due to Moving Concentrated Loads	190
6.11	Shear due to Moving Concentrated Loads	192
6.12	Reversal of Stress Example	195
6.13	Locomotive Portion of the Train Load	197
6.14	Influence Lines for Floor Beams	198
6.15	Influence Lines for Frames	201
Chapter 7 Arches, Bridges and Cables		
7.1	Arches	211
7.2	What is a bridge?	216
7.3	History of Bridges	216
7.4	Bridge Basics	217
7.5	Types of Bridges	220
7.6	Basic Concepts and Theoretical Assumptions of Cables	251
7.7	Developing Equation for General Cable	253

Theorem	
7.8 Cables with Horizontal Chord Subject to Uniformly Distributed Loading	259
7.9 Cable System with Single Load at Mid-span	263
7.10 Parabolic Cable: Subjected to Linear Uniform distributed Load	264
7.11 Uses of cables	276
7.12 The Catenary with its Parabolic Approximation:	
An Example of the Parabola versus the Catenary	278
References	285
